

ALLEN HARBOR DREDGING

Town of Harwich, MA

The Town of Harwich engaged the services of Coastal Engineering to begin the process of developing a town-wide Harbor Management Plan. A feasibility study addressing the dredging of Allen Harbor was performed, along with consultations and recommendations to the Town on long-term financial planning and budgeting for ongoing dredge maintenance. This effort is being done in tandem with a town-wide beach nourishment plan to help ensure the economic and environmental future of the Town's important harbor and beach resources.
