

BREWSTER MEMORIAL CEMETERY

Town of Brewster, MA

Coastal Engineering Co. designed an additional section at Brewster Memorial cemetery. Land surveyors worked in tandem with town to define the required topography improvements and plan row layout for the burial areas. Placement was identified for walkways and memorials, and granite bounds were set to mark up the territory with the goal of better keeping inventory of available plots on a map.

SERVICES

- Land surveying
- Design and layout of current phase of town cemetery plots
