

HICKORY LANE, CEDAR LANE AND HOLLY AVE INTERSECTION DRAINAGE IMPROVEMENT

Town of Brewster, MA

SERVICES

The Town of Brewster DPW engaged Coastal Engineering Co. to design improvements to stormwater drainage facilities at the intersection of Hickory Lane, Cedar Lane, and Holly Ave. Stormwater runoff had impacted private property along the roadway for many years due to inadequate stormwater systems. The improvements included installation of catch basins and leaching structures at intermediate locations along the roadway and at low points to contain the stormwater runoff and provide recharge into the ground.
