

MONOMOY REGIONAL HIGH SCHOOL

Harwich, MA

Coastal Engineering Co. worked with Mount Vernon Group Architects to provide land surveying services for the construction of a new Monomoy Regional High School for the towns of Harwich and Chatham, funded in collaboration with Massachusetts School Building Authority.

This facility benefits the entire Monomoy community as an educationally-appropriate, cost-effective facility offering greater opportunities in academics, arts and athletics, including increased Advanced Placement and foreign language course; hands-on learning in engineering, culinary arts, marine science; expanded visual and performing arts facilities and programs, and 24 varsity and junior varsity MIAA-sanctioned athletic teams.

SERVICES

- Existing conditions survey of a 50 acre parcel of land
- Preparation of an existing conditions site plan
- Layout control points for construction staking
- Utility as-built plan
