

# NANTUCKET HARBORMASTER

Nantucket, MA

Town of Nantucket is planning to replace the existing 1960s Harbormaster building with a new facility. Coastal Engineering is working with Stephen Kelleher Architects to design a 3,400-square-foot, two-story structure that meets the historic district as well as a FEMA velocity zone requirements.

## SERVICES

- Existing conditions survey and site plan
- Civil engineering design plans, specifications, and bid documents for the proposed new harbormaster office and site improvements
- Environmental permitting
- Construction contract administration
