

## NOBSKA LIGHT

Woods Hole, MA

The Friends of Nobska Light partnered with Coastal Engineering Co. and Brown, Lindquist, Fenuccio & Raber Architects to restore and preserve Nobska Light, a cherished icon of the greater Falmouth area. This federally-owned lighthouse listed on the National Register of Historic Places is located in a rolling well vegetated low density residential area that forms part of the backdrop for the lighthouse. The overall objective of the project was to maintain the picturesque quality of the buildings, the site, and its setting. The first step was to maintain and restore the keepers' houses and tower so that they can be opened to the public. The keepers' houses will host educational exhibits on Falmouth's maritime history once the buildings are restored. The property will also feature a handicap accessible walkway. Coastal Engineering Co. has provided civil and structural engineering and environmental permitting services for the project.

### SERVICES

- Structural conditions assessment and report
- Structural engineering design for the lighthouse and keeper's houses repairs, retrofit and augmentation related to change of occupancy
- Civil engineering services for preparation of a site plan
- Environmental permitting
- Construction contract administration
