

## TARGET PLAZA

Hanover, MA

Coastal Engineering Company was brought onto the project team to design and permit an on-site wastewater treatment facility and subsurface disposal system. The 32,000 gallon per day system was designed to accommodate the sewage flow from 137,600 square foot Target Store, several restaurants, offices, and retail stores planned for the plaza. Working with the client and site engineer, Coastal Engineering Co. successfully designed, permitted and oversaw the installation of the facility.

### SERVICES

- Wastewater treatment facility design
- Hydrogeologic evaluation
