

# VINEYARD GOLF CLUB

Edgartown, Martha's Vineyard, MA

The nation's only all-organic 18-hole golf course has enjoyed a well-deserved reputation as a natural beauty since it opened in 2002. Seamlessly integrated into 235 acres in Edgartown on Martha's Vineyard, the club has been favorably compared to the great Surrey heathland courses in England. This traditional links-style course with sodded, re-vetted, walled bunkers, natural undulations in the ground, and trees framing the holes is hailed as one of the most environmentally sensitive golf courses ever built in the United States. Coastal worked with an architect to site a clubhouse, turf management building, and family duplex with dormitory housing for this award-winning golf facility.

## SERVICES
